

First you spend the land. Then you decide what for.

Alaska is moving 30 to 31 square miles of public land to its own development bank. For free.

THE DEAL

The seller and the buyer are the same government.

SELLER	State of Alaska, DNR
BUYER	AIDEA, state development bank
PRICE	\$0
METHOD	noncompetitive, no bid
USE	-----

The state land agency is moving 30 to 31 square miles of state land to AIDEA, its own development bank. No cost, no bid.

WHAT IT IS FOR

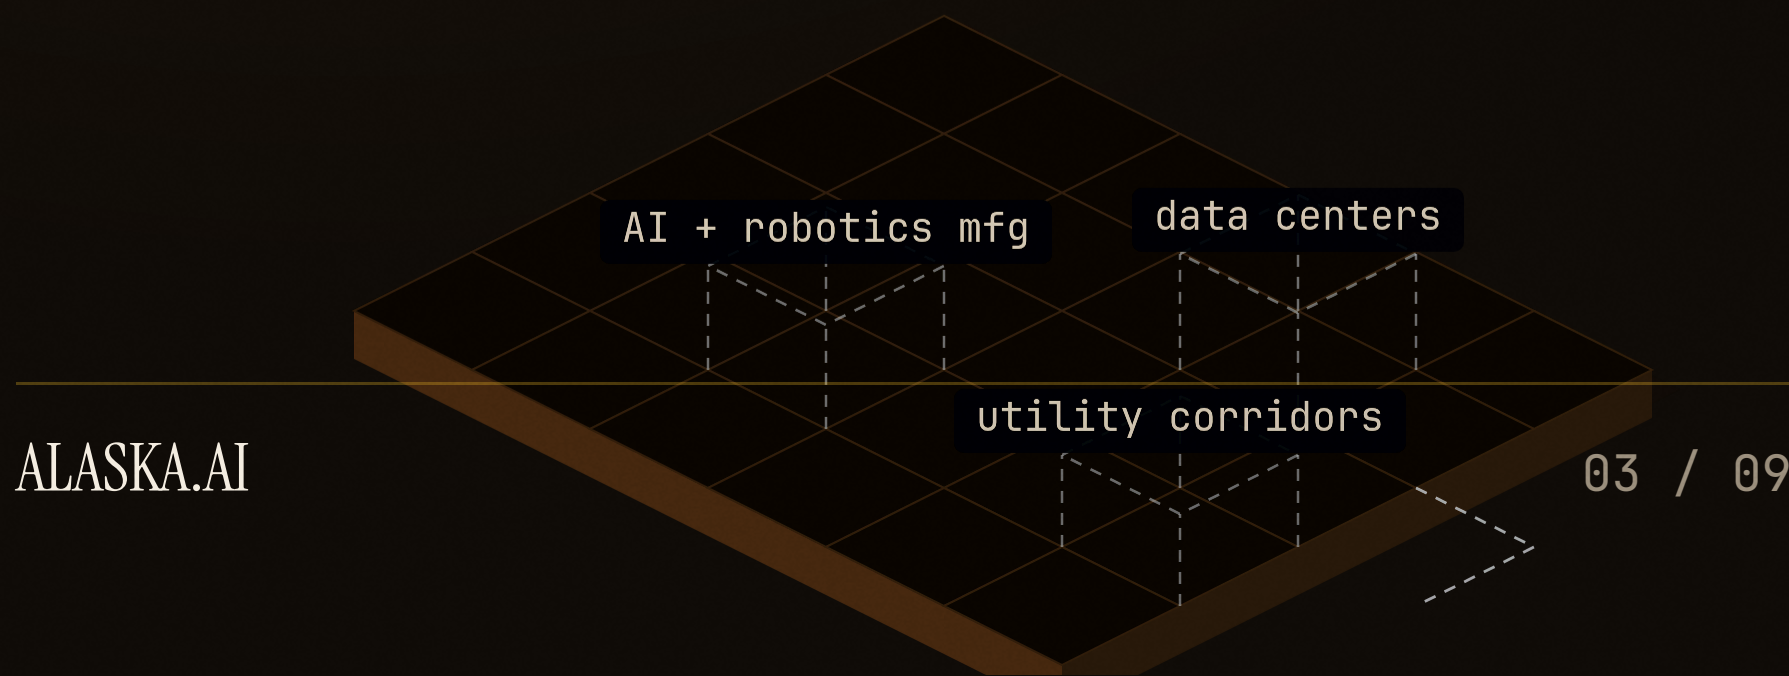

The purpose is a word on a plat.

41 PAGES

"There are no pre-determined and set land use decisions made by AIDEA."

RANDY RUARO, AIDEA EXECUTIVE DIRECTOR

The 41 page decision lists scalable data centers and AI and robotics manufacturing among the uses. Not one is a project yet.

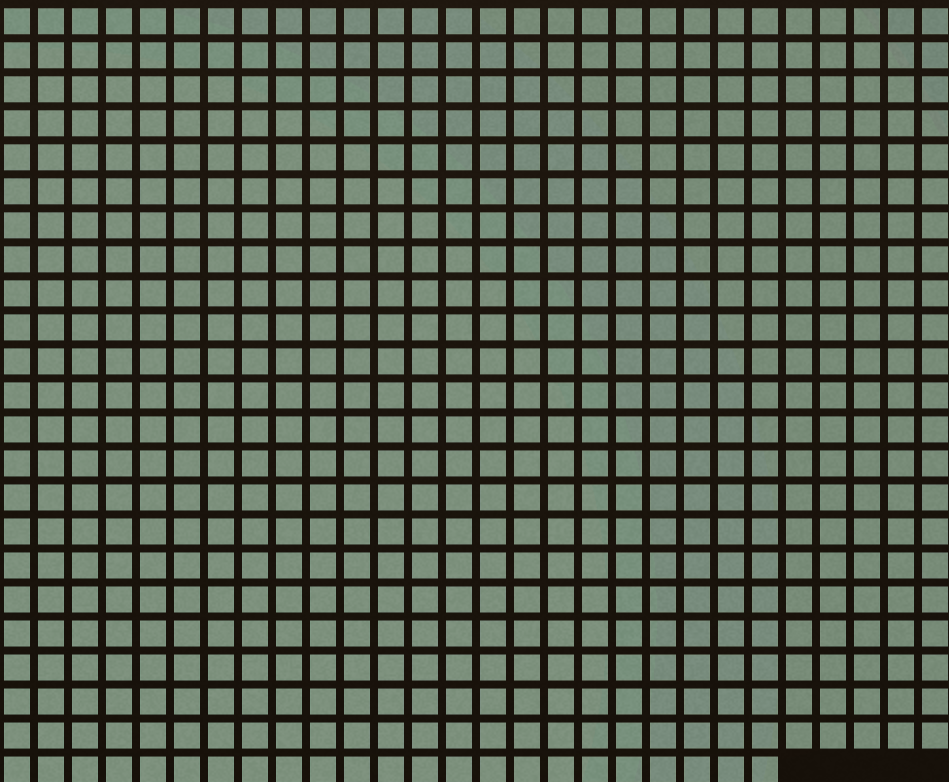

The boom Alaska does not have.

ALASKA 8

VIRGINIA 639

counts per Alaska's News Source

Alaska has 8 data centers, the fourth fewest of any state. Virginia has 639.

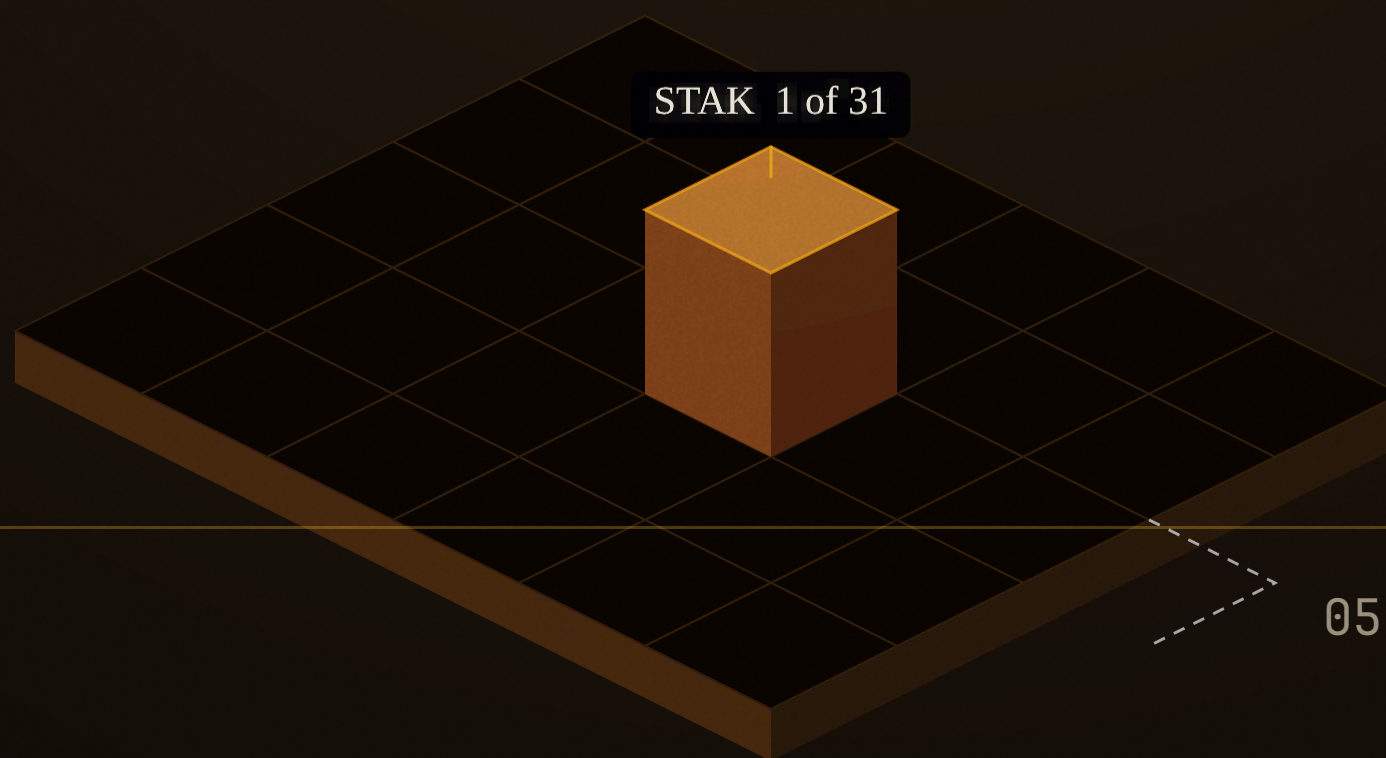

TO SCALE

The biggest one proposed fills one square.

The largest proposed AI data center in Alaska, STAK on the North Slope, would cover about 1 square mile. Here it fills 1 of 31 cells. Thirty sit empty.

STAK, reportedly over \$10 billion, would draw more than 1 gigawatt, about 30 percent above urban Alaska's peak.

The town on the boundary wants to ban them.

The City of Houston has an ordinance to ban data centers, with a vote set for August 13. In March the Borough Assembly voted 6 to 1 to designate parcels, overriding a mayoral veto.

The ordinance claims a documented risk of accelerated permafrost thaw.

HOUSTON BAN (pending)

6 to 1

TWO CLOCKS

Two votes, six days apart.

AUG 13

Houston votes on a
data-center ban

AUG 19

State comment window
closes, 5 PM

The town votes on its ban six days before the state closes its comment window on the giveaway. They are pulling opposite ways.

Everything is decided but the one thing that matters.

SELLER	State of Alaska	BUYER	AIDEA
PRICE	\$0	METHOD	noncompetitive
ACRES	30 to 31 sq mi	DECISION	41 pages
LOCAL	Assembly 6 to 1, veto overridden		

USE _____

The land is given now, for free. What it is for gets decided later. The land is spent first. The purpose, and the risk, come second.

YOUR MOVE

Should Alaska spend public land before it knows what it is for?
