

Alaska's second wire has a passenger list.

Data centers aren't on it.

The money names the military, and mining.

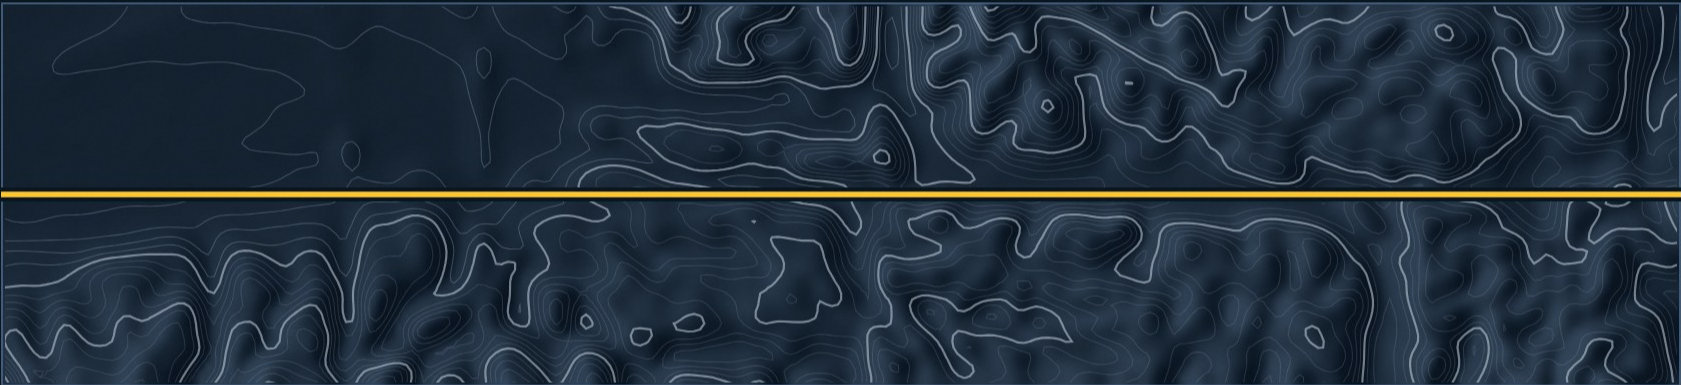

Energy Secretary Chris Wright tied the project to "the major U.S. military expansion currently underway in Alaska" and to mining. DOE says the line adds a pathway to "major military installations." The release never says data center.

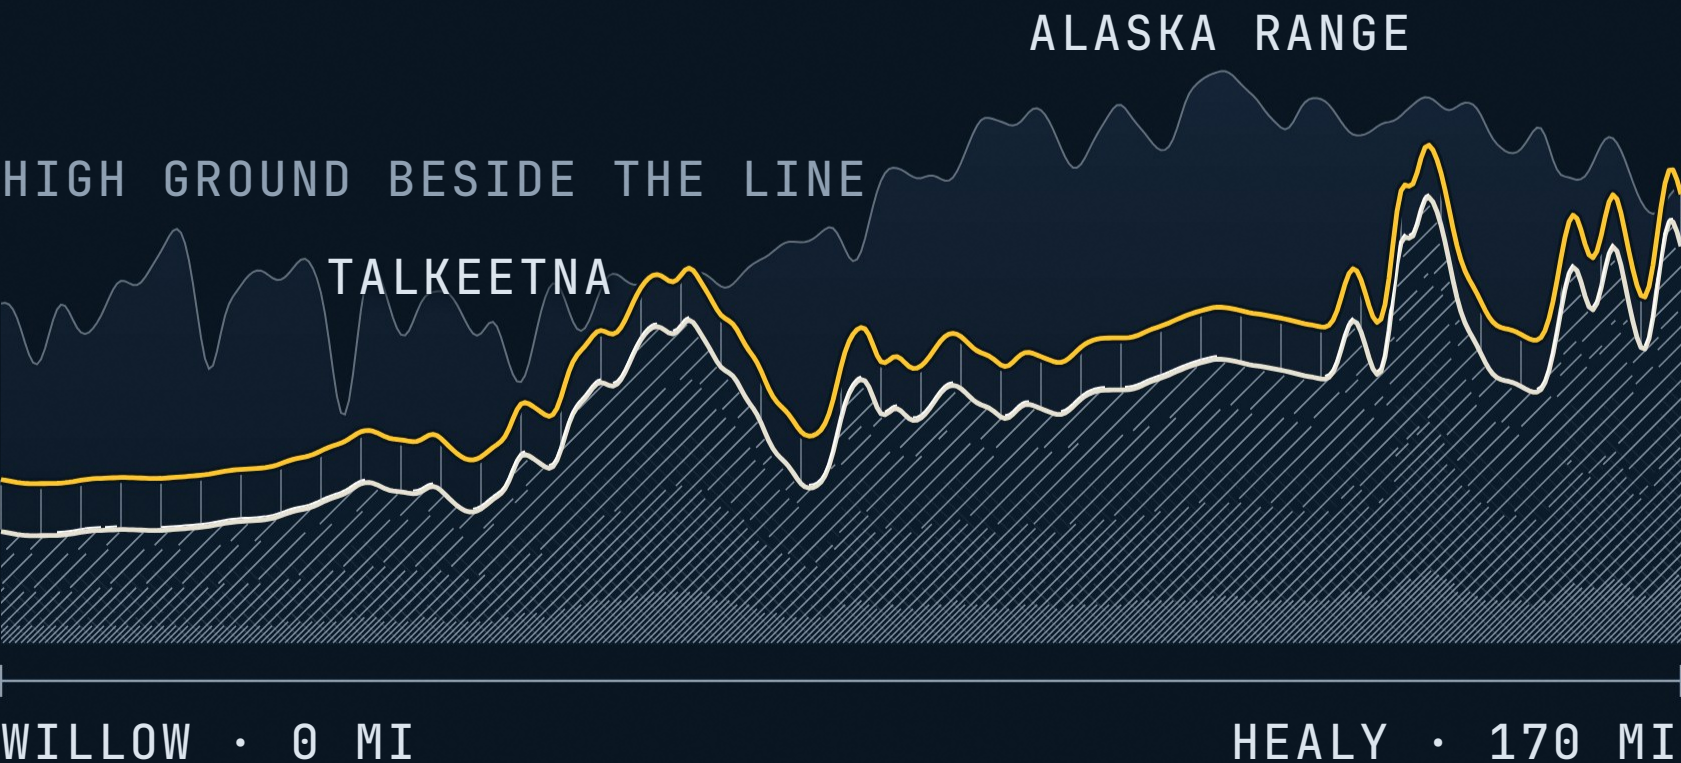

One line joins the two halves today.

AEA's Alaska Intertie runs 170 miles from Willow to Healy. The state built it in the mid-1980s.

PLAN • STRAIGHTENED ALONG THE LINE

PROFILE ALONG THE LINE • VERTICAL SCALE EXAGGERATED

The record names its stops and its price. Not its route.

The Alaska delegation lists the Beluga substation, West Susitna, Willow and Healy. AEA's Curtis Thayer told the Alaska Beacon the federal money will likely go to engineering, planning and permitting.

ALASKA INTERTIE • 170 MI

BELUGA TO HEALY • ABOUT 223 MI

NAMED STOPS • IN ORDER, NOT TO DISTANCE

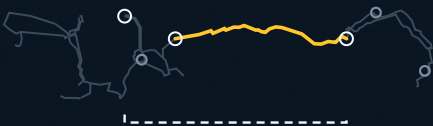

○ BELUGA ○ WEST SUSITNA ○ WILLOW ○ HEALY

ABOUT \$418 MILLION • PRELIMINARY ESTIMATE

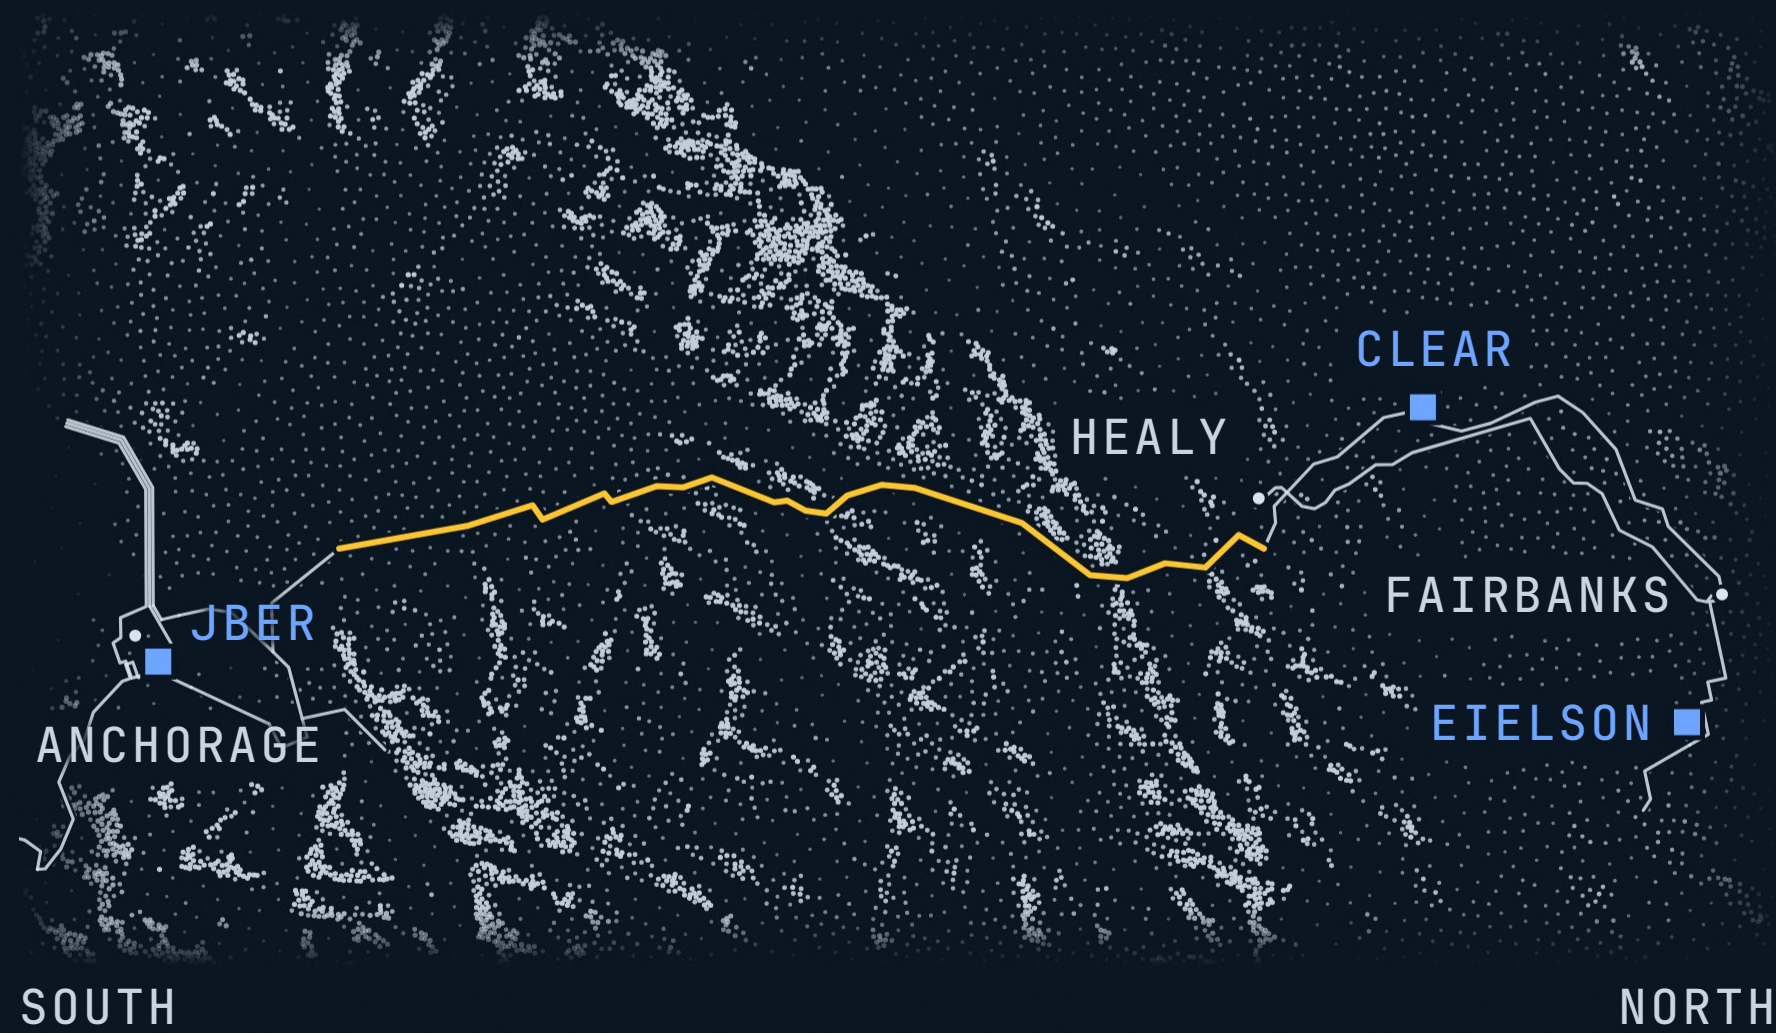

UP TO \$150 MILLION • DEFENSE PRODUCTION ACT
\$268 MILLION • NON-FEDERAL, PER DOE

LATE AUGUST • AEA LISTS IT "UNDER CONSIDERATION"
OCTOBER 5TH • DOE NAMES IT

On Railbelt bases, land offered for AI data centers.

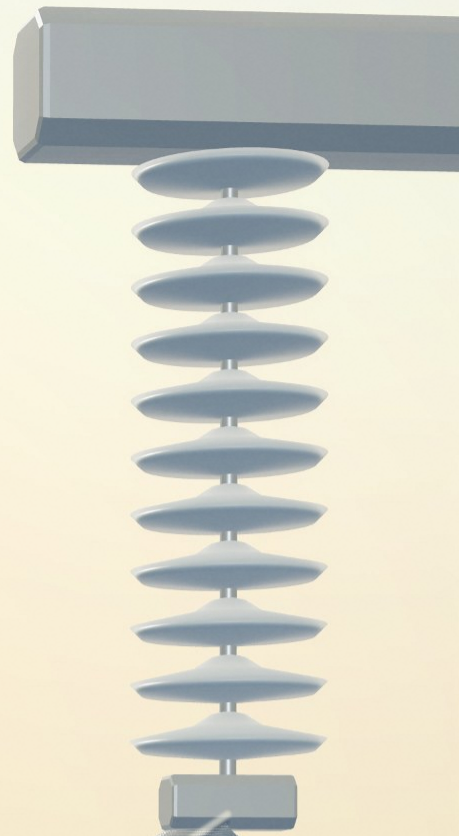

Proposals were due June 29th. None had been awarded as of late September, per the American Homefront Project. Most of Alaska's bases use power that flows through the intertie, the Alaska Beacon reports.

12 PARCELS • ABOUT 4,700 ACRES • ACROSS ALL THREE

One corridor. No second path between the halves.

ILLUSTRATION, NOT A SURVEYED STRUCTURE • NOON

"I am not a proponent of data centers down at JBER or at our interior installations because we are not able to support them because of an insecure energy base at this time."

HEALY, WHERE THE INTERTIE ARRIVES

ALASKA RANGE, FROM THE NORTH

07 / 09

Five records. Two say "data center." The one with the money doesn't.

RECORD	WHEN	WHAT IT NAMES	DATA CENTER
DOE RELEASE UP TO \$150 MILLION	OCTOBER 5TH	MILITARY, MINING	NO
AEA SLIDES TO WRIGHT	LATE AUGUST	"TRANSMISSION REDUNDANCY"	NO
DELEGATION, AS REPORTED	OCTOBER 5TH	A SINGLE CORRIDOR TODAY	NO
AIR FORCE LAND OFFER	THIS SPRING	4,700 ACRES, 12 PARCELS	YES
SEN. MURKOWSKI	REPORTED SEPTEMBER 28TH	"INSECURE ENERGY BASE"	YES

Reading them side by side is this deck's work, not DOE's.

Should the Beluga to Healy line be planned with data center load in it, or without?
