

SNAP, PUBLIC LAW 119-21

Alaska's SNAP bill reads a year that opened Thursday.

THE LAW READS THREE YEARS BACK

Fiscal 2027 is read either way.

From fiscal 2029, a state's share uses its error rate from three fiscal years before. Fiscal 2030 reads fiscal 2027, opened October 1st, whichever start applies.

FIX
SCHEDULED

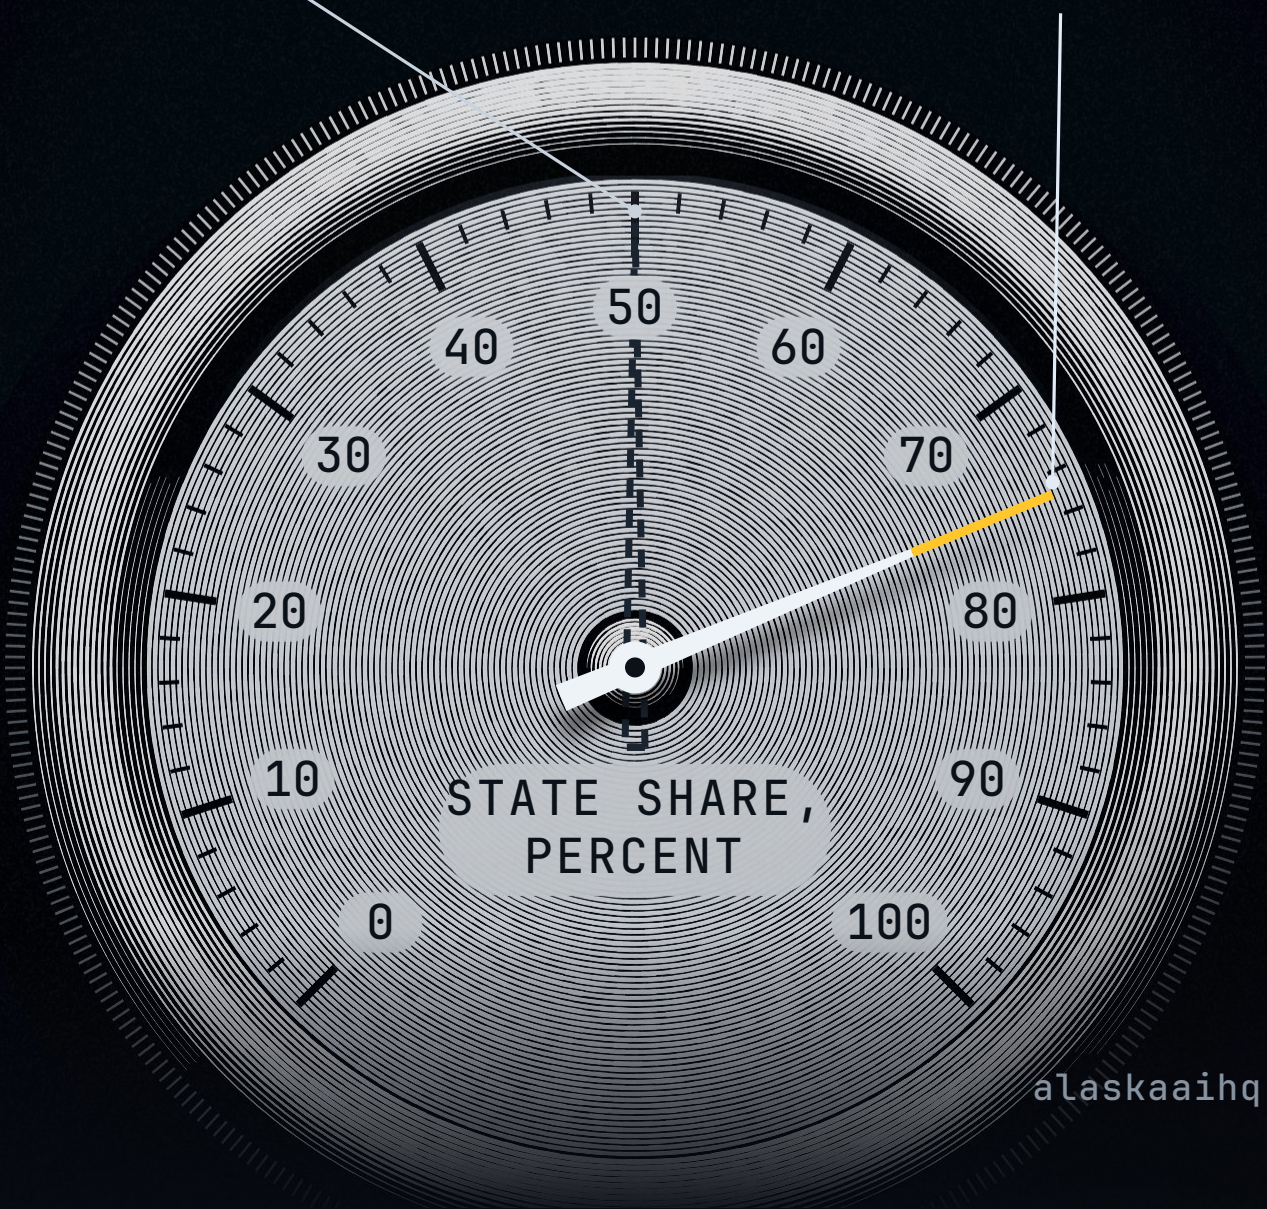

IN EFFECT OCTOBER 1ST

The first share moved on Thursday.

Washington's share of SNAP administration fell from 50 to 25 percent, so Alaska now pays 75. Legislative Finance estimates about \$6.6 million more a year. The Anchorage Daily News reported nearly \$11 million.

THROUGH FISCAL 2026, 50

FROM FISCAL 2027, 75

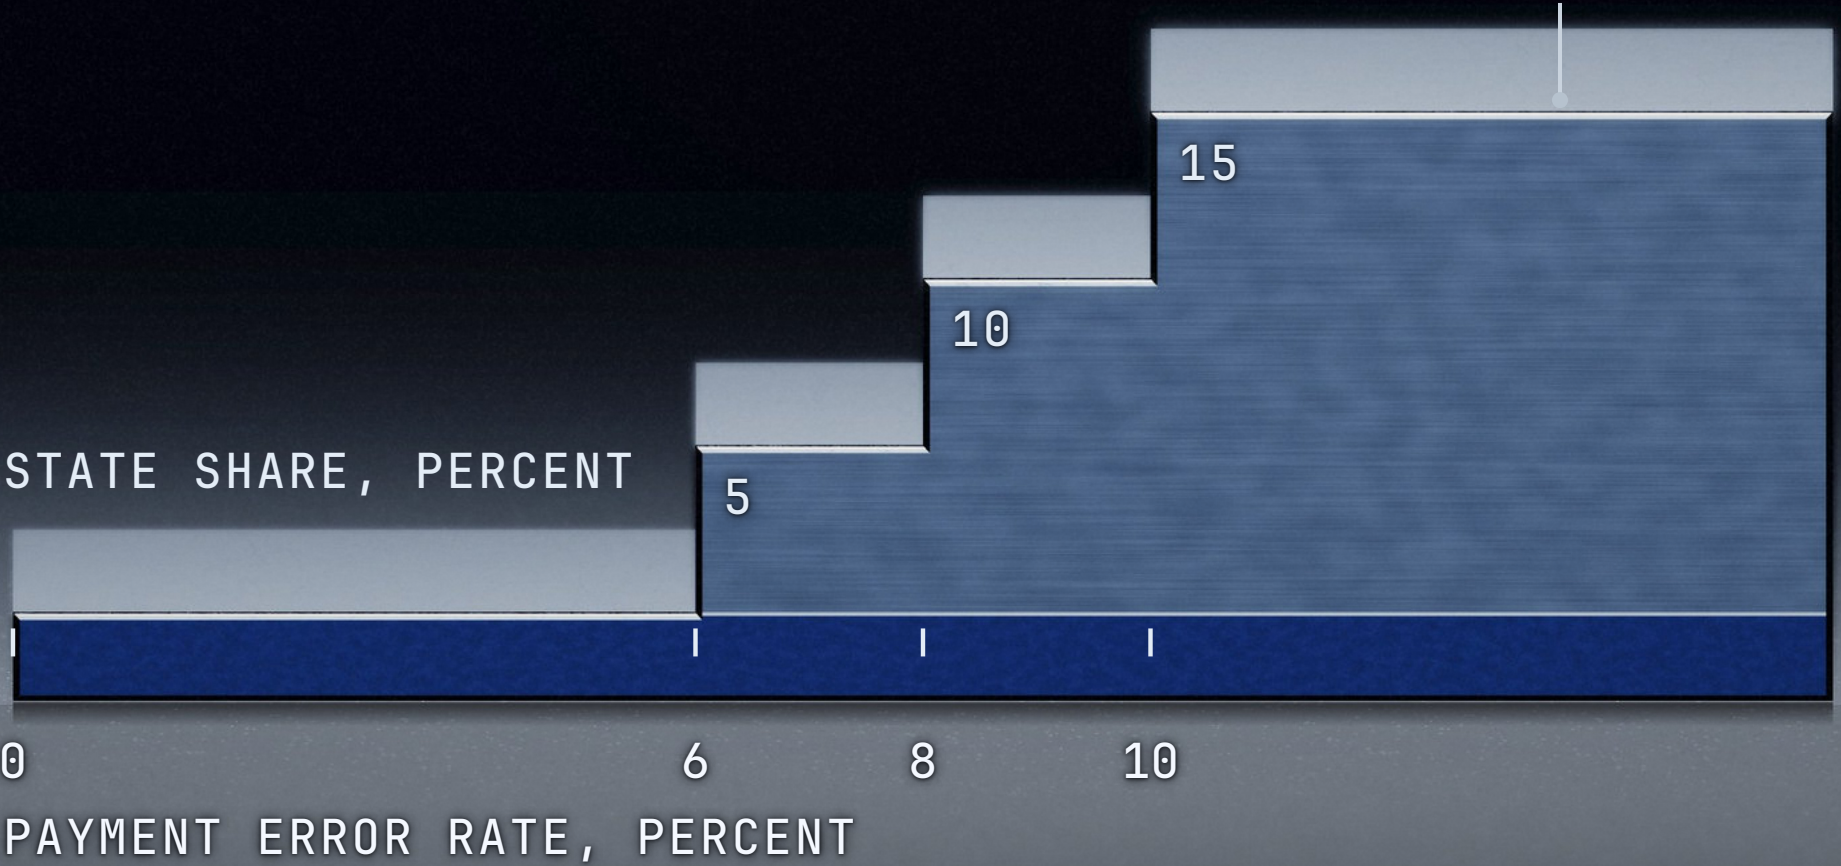

THE BENEFIT SHARE, FROM FISCAL 2028

The second share is a staircase.

Under 6 percent, a state pays none of the benefit cost.
At 10 or more, it pays 15 percent.

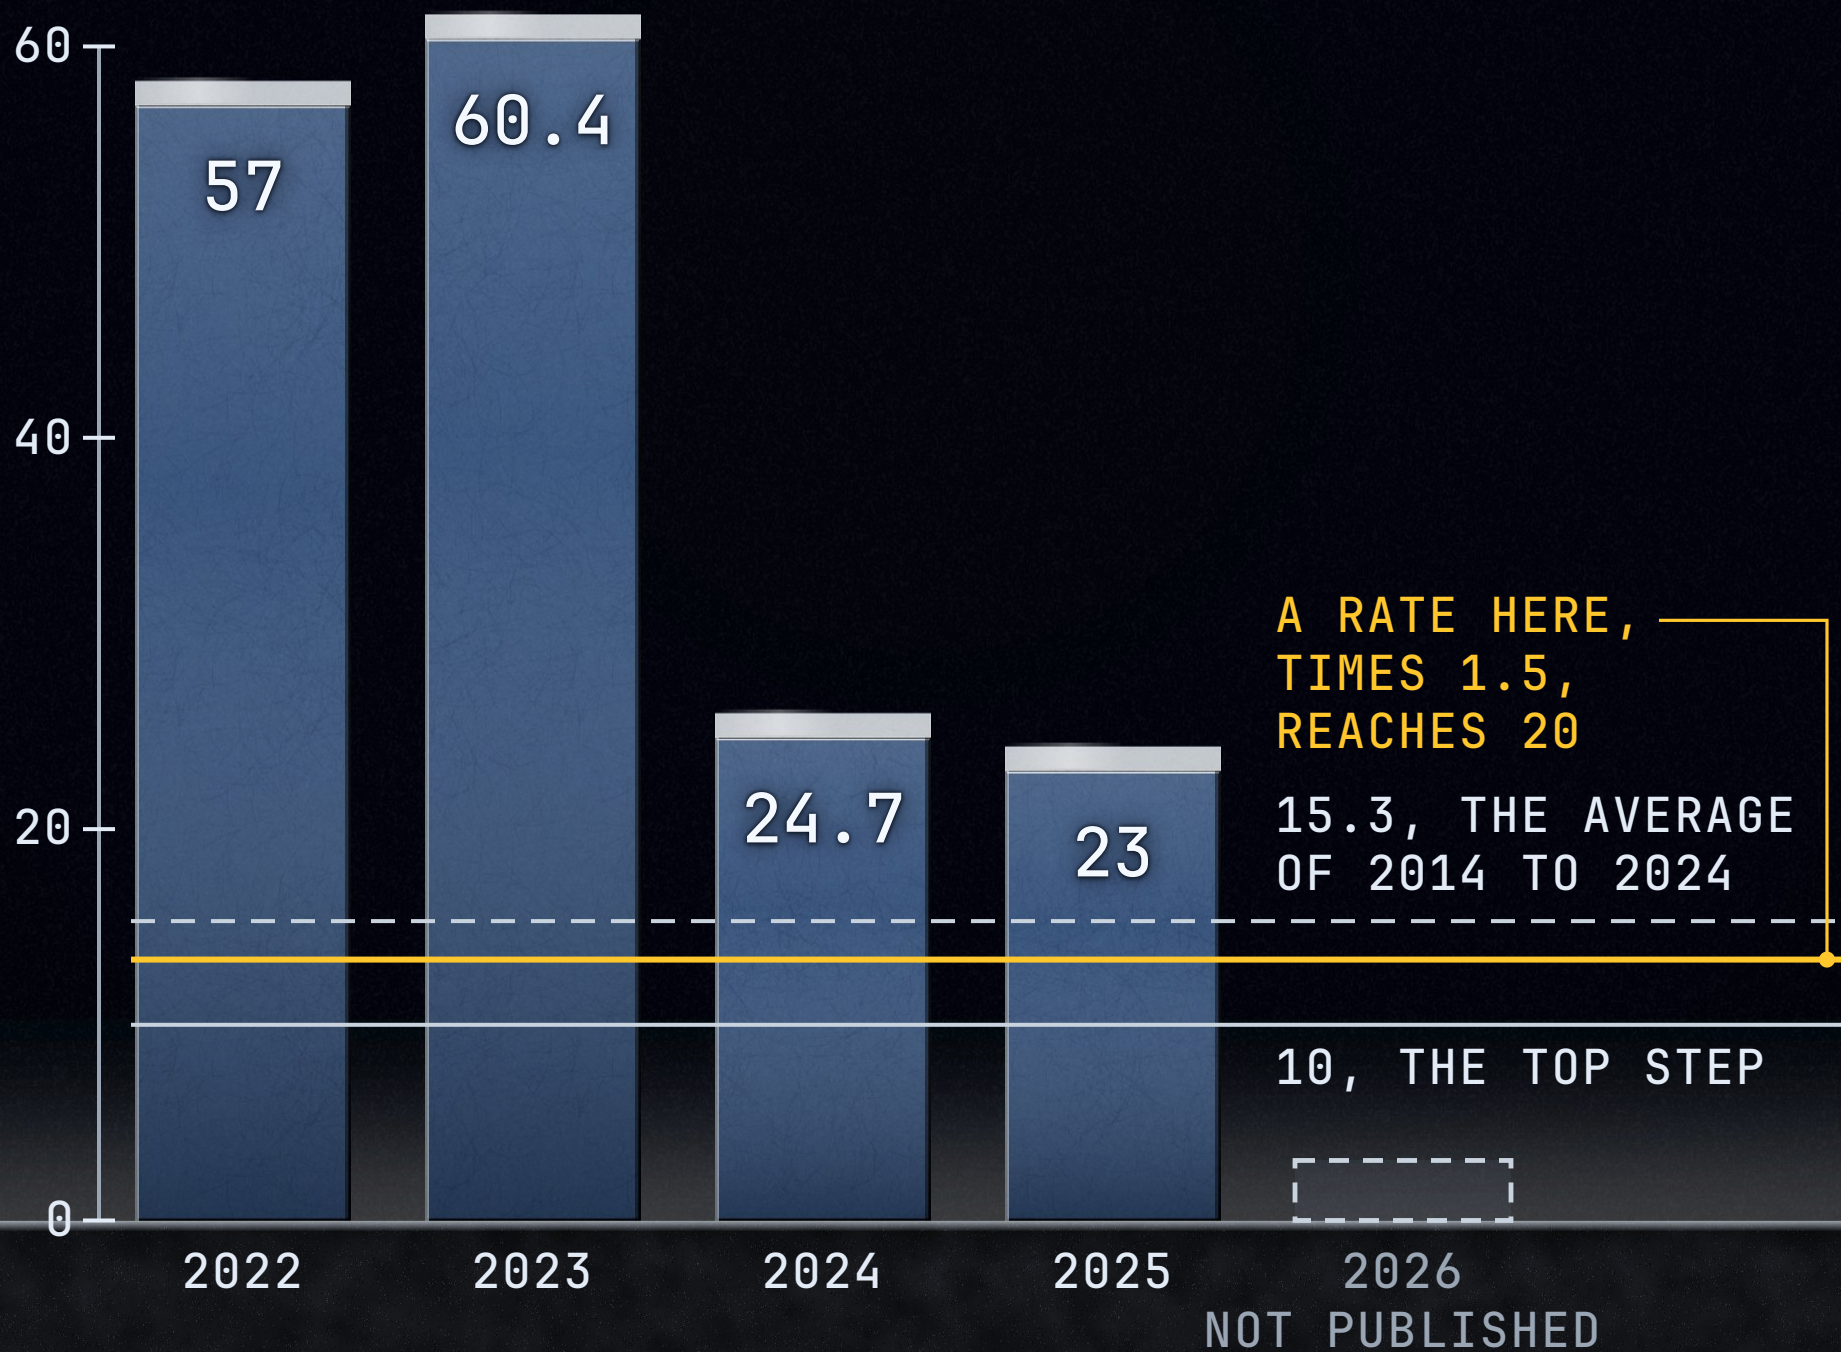

AT THE TOP STEP, ALASKA COULD OWE
MORE THAN \$42 MILLION A YEAR,
ADN REPORTED

ALASKA'S SNAP PAYMENT ERROR RATE, BY FEDERAL FISCAL YEAR

The record, against the statute's lines.

Alaska's 2025 rate, times 1.5, cleared 20 percent, which moved its start to fiscal 2029. Clear it again in 2026 and the start moves to 2030.

THE DEPARTMENT OF HEALTH, IN ITS OWN WORDS

"COBOL on a mainframe."

How the state describes EIS, its legacy eligibility system.
ARIES, the newer one, holds only MAGI Medicaid.

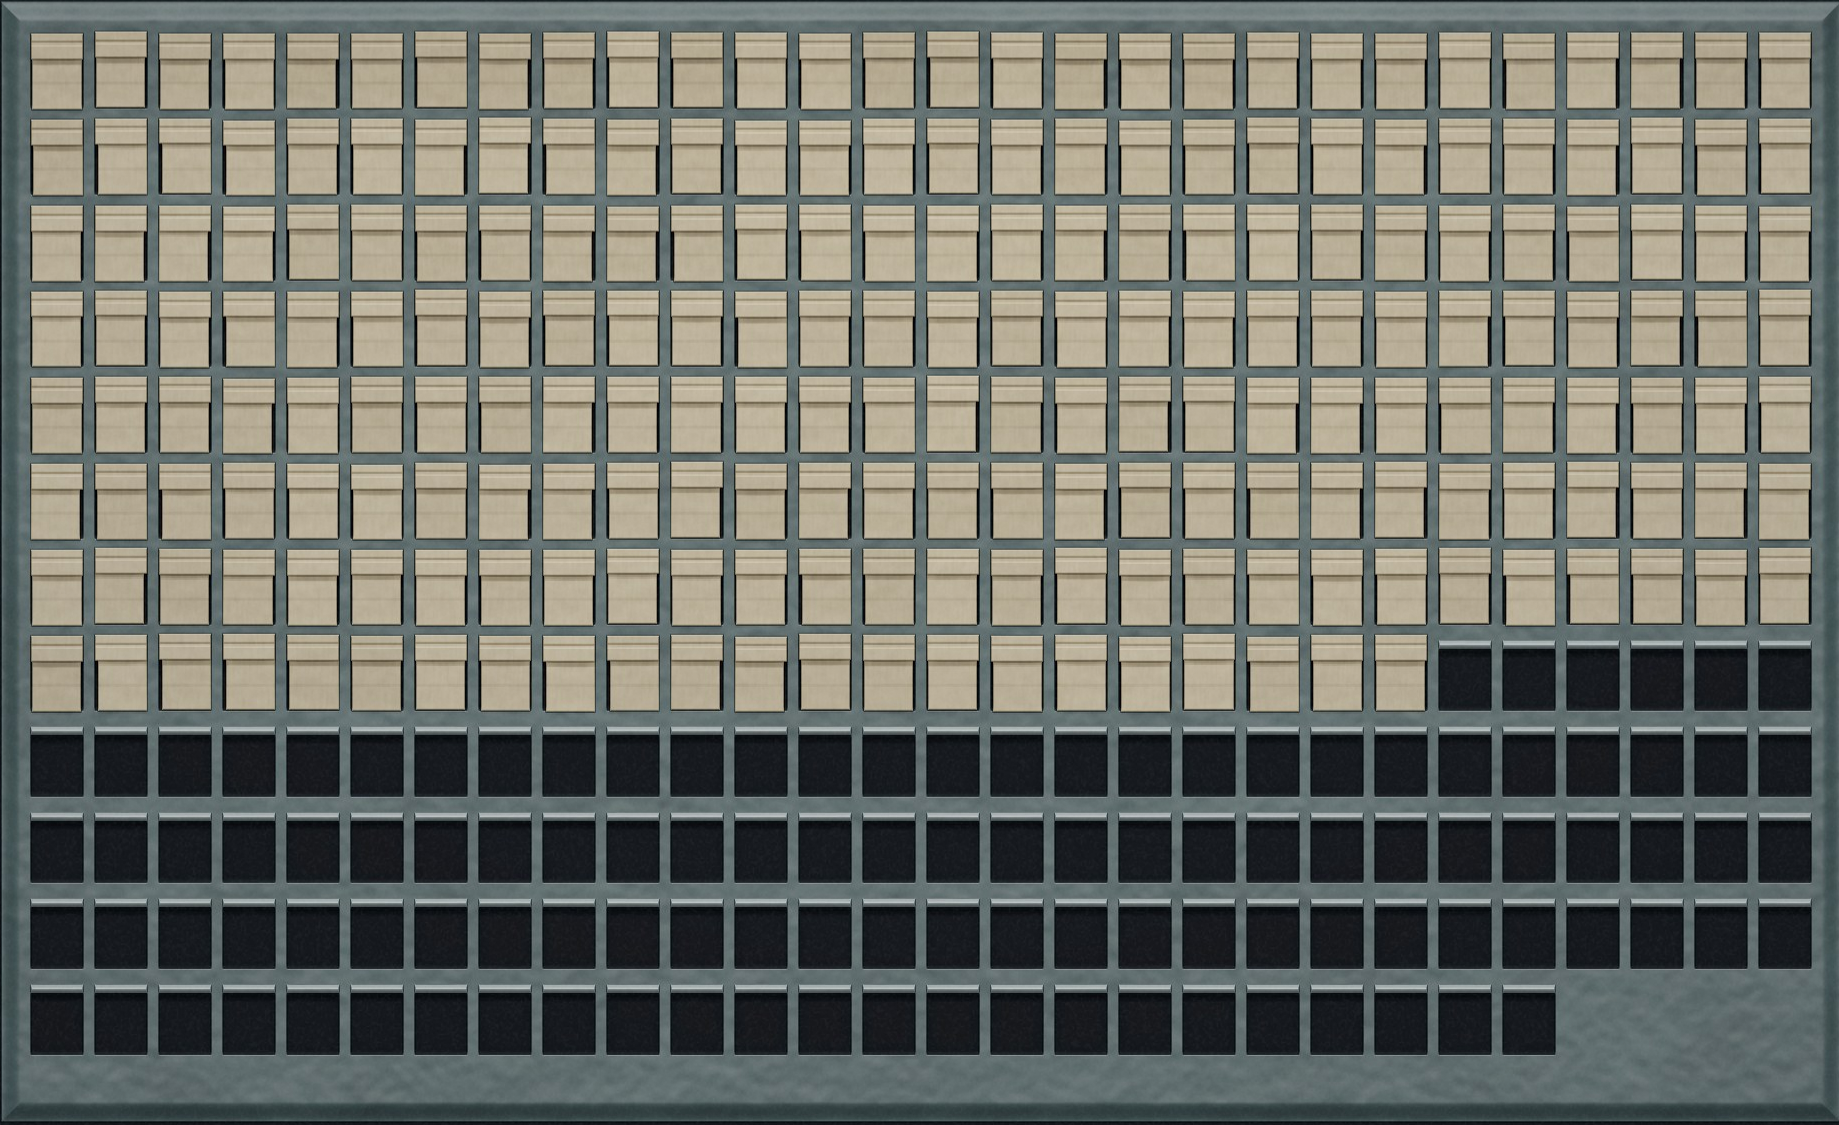

ELIGIBILITY TECHNICIANS, STATE FISCAL 2025

218 of 332 positions filled.

The yearly average left 34.3 percent vacant. "During periods when Alaska had significant workload backlogs, that had a larger impact on the state's error rate," the Department of Health wrote.

ELIGIBILITY MODERNIZATION, AS BUDGETED

The fix is scheduled for 2028.

Milestone 2, estimated at \$20 million, began in October 2025. Milestone 2.5, estimated at \$5 million, would move SNAP data off the mainframe. The Department says the biggest gains wait for full modernization.
