

14 days in code, or a limit set in policy?

DAY 14 • AUGUST DRAFT

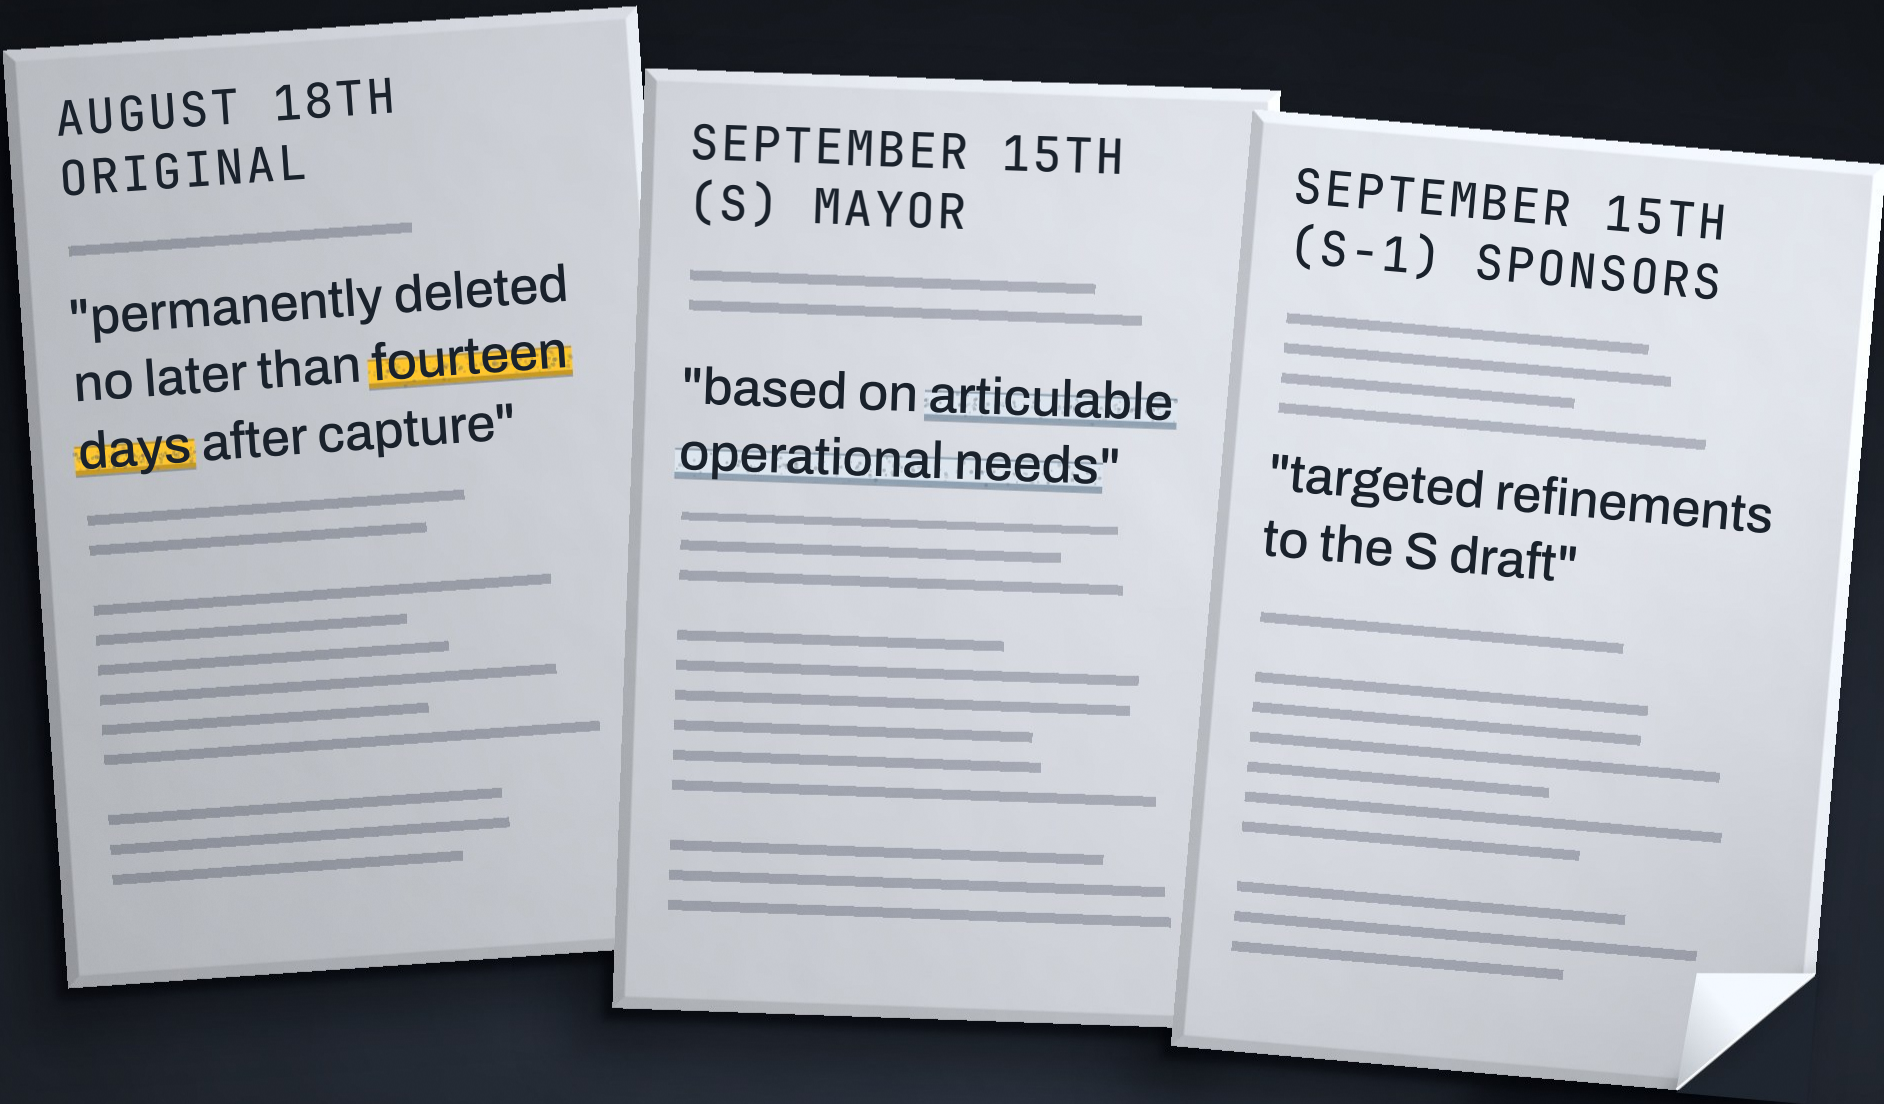

SEPTEMBER TEXTS
NO 14-DAY RULE

ONE LOT, ONE STRIP A NIGHT

AO 2026-108 • THREE TEXTS

Three texts. One sets a day.

The sponsors' August 18th original would delete plate data within 14 days, and searching older data would need a warrant. The mayor's September 15th substitute asks for a policy limit "based on articulable operational needs." The sponsors' own S-1 builds on the mayor's text.

WHAT ELSE THE ORIGINAL TIMED

The original timed the live feed too.

Live camera access would shut off after sixty minutes,
renewed thirty at a time. Trials of new tools, 90 days at most.
Plate reader authority, ending January 1st, 2031. The
September texts set other clocks, 30 days to report a policy
change and 45 to act on a complaint.

SEPTEMBER TEXTS • TESTS AND PILOTS, NO STATED LIMIT

WHAT SEPTEMBER ADDED

September's texts name artificial intelligence.

Both define surveillance technology as tools that work "by using fully or partially-automated machine learning, artificial intelligence, or similar technology." The August original defined it by what a system collects.

APD'S ONLY PLATE READERS, PER THE CHIEF IN AUGUST

PLATE READ • OPTICAL CHARACTER RECOGNITION

WHAT EXISTS TODAY

There is already a 14.

APD's own page says scanned plate data is deleted after 14 days. That's police policy on a web page, not code.

14

14 TREAD REPEATS • APD POLICY

SAVE THIS • AO 2026-108 SIDE BY SIDE

Three texts, side by side.

	PLATE DATA	TRIALS	SUNSET	TAKES EFFECT	DEFINED BY
AUGUST 18TH ORIGINAL	14 DAYS	90 DAYS	2031	90 DAYS	WHAT IT COLLECTS
SEPTEMBER 15TH (S) MAYOR	A POLICY LIMIT	NO STATED LIMIT	NONE	30 DAYS	AI AND MACHINE LEARNING
SEPTEMBER 15TH (S-1) SPONSORS	NO 14-DAY RULE	AS (S)	NONE	30 DAYS	AI AND MACHINE LEARNING

OUTSIDE EVERY TEXT
A STORE'S OWN CAMERAS

LOWE'S STATEMENT, PER ADN
TYPICALLY NO MORE THAN 90 DAYS

APD'S PAGE TODAY • 14 DAYS • POLICY

- GOLD PAINT • A NUMBER IN THE TEXT
- WHITE PAINT • A POLICY OR NONE
- BARE ASPHALT • OUTSIDE THE TEXTS

UNTIL RECENTLY, NO FLOCK IN ALASKA, PER KTOO

No version reaches this pole.

Flock says it began installing plate readers for a private customer in Alaska the week before October 5th. A crowdsourced map showed eight at two Anchorage Lowe's stores, ADN reports. APD says it doesn't use Flock and has no access to them. Each text governs city agencies.

OCTOBER 14TH WORK SESSION • OCTOBER 20TH MEETING

October 20th could set the city's clock.

The Assembly returns to AO 2026-108 on October 20th, after a work session scheduled for October 14th. The crime center it governs could connect up to 750 cameras. In late August, 238 were registered with APD and 11 integrated, per KTUU.

UP TO 750 • A CAPACITY, NOT DRAWN

ONE DISC, ONE CAMERA
AUGUST • 238 REGISTERED
11 INTEGRATED

BEFORE OCTOBER 20TH

Where should Anchorage write its number, in code or in policy?

Say which below.
