

KODIAK, SEPTEMBER 3RD, 2026

57°47'N 152°24'W

Five turning. One still.
A new load with no
number on it.

C11 C12

PILLAR MOUNTAIN ACCESS RD / 28MM / 1.4M / SE

The Navy says the building runs off the existing grid.

The cooperative says the Navy has not told it how much power the building will use. Both sentences are true at once. The second one is the planning problem, because the utility has to size for a load nobody has given it a figure for.

C03

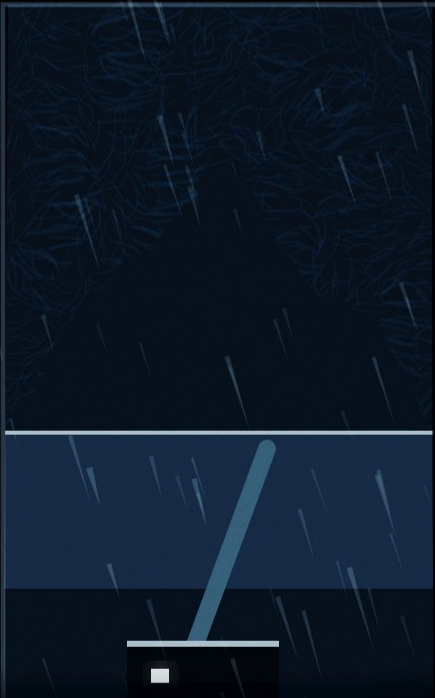

C04

WHAT THE ISLAND HAS

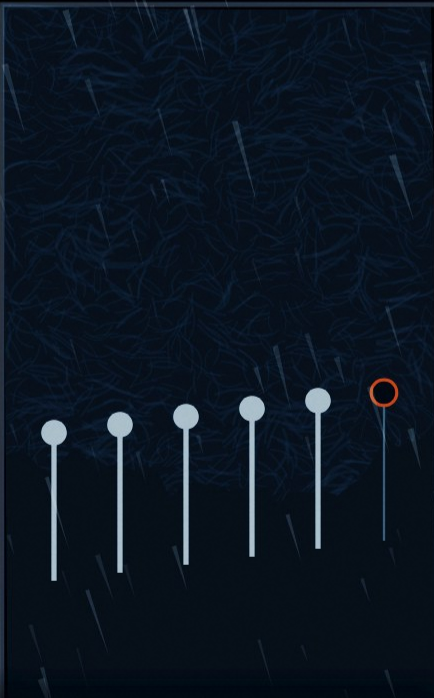

What the island runs on.

"KEA owns, operates, and maintains an isolated grid."
(C08)

DIFFERENT THINGS, NOT ONE SUM.

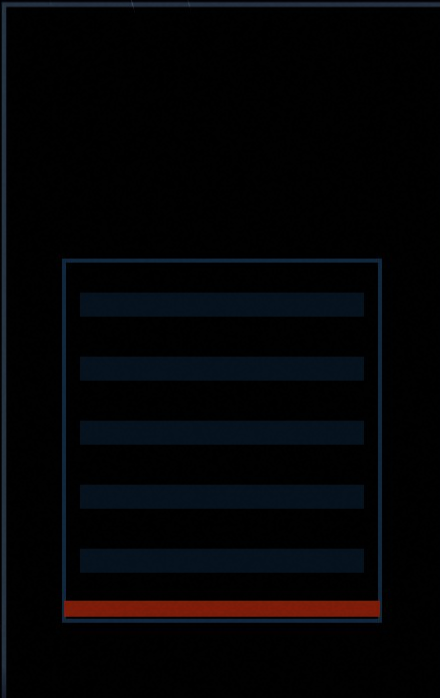

TERROR LAKE / ABOUT
85 PCT OF GENERATION
(C09)

PILLAR MOUNTAIN / SIX
AT 1.5 MW (C11) / ONE
OFFLINE (C12)

FLYWHEELS AND
BATTERY / TWO AND ONE
(C10)

DIESEL / BACK UP (C10)

In March the peak hit
just over 31 MW.

"We didn't have to turn diesels on,
but as the load continues to grow,
that could certainly become a potential,"

DAN MENTH, KODIAK ELECTRIC ASSOCIATION (C13)

C06

The utility's own word for this grid is isolated.

KODIAK ELECTRIC ASSOCIATION (C08)

TERROR LAKE, 1985 (C26).
PILLAR MOUNTAIN, 2009 (C27).
UPPER HIDDEN BASIN, 2019 (C28).

KODIAK ISLAND, PRINCIPAL ISLAND ONLY

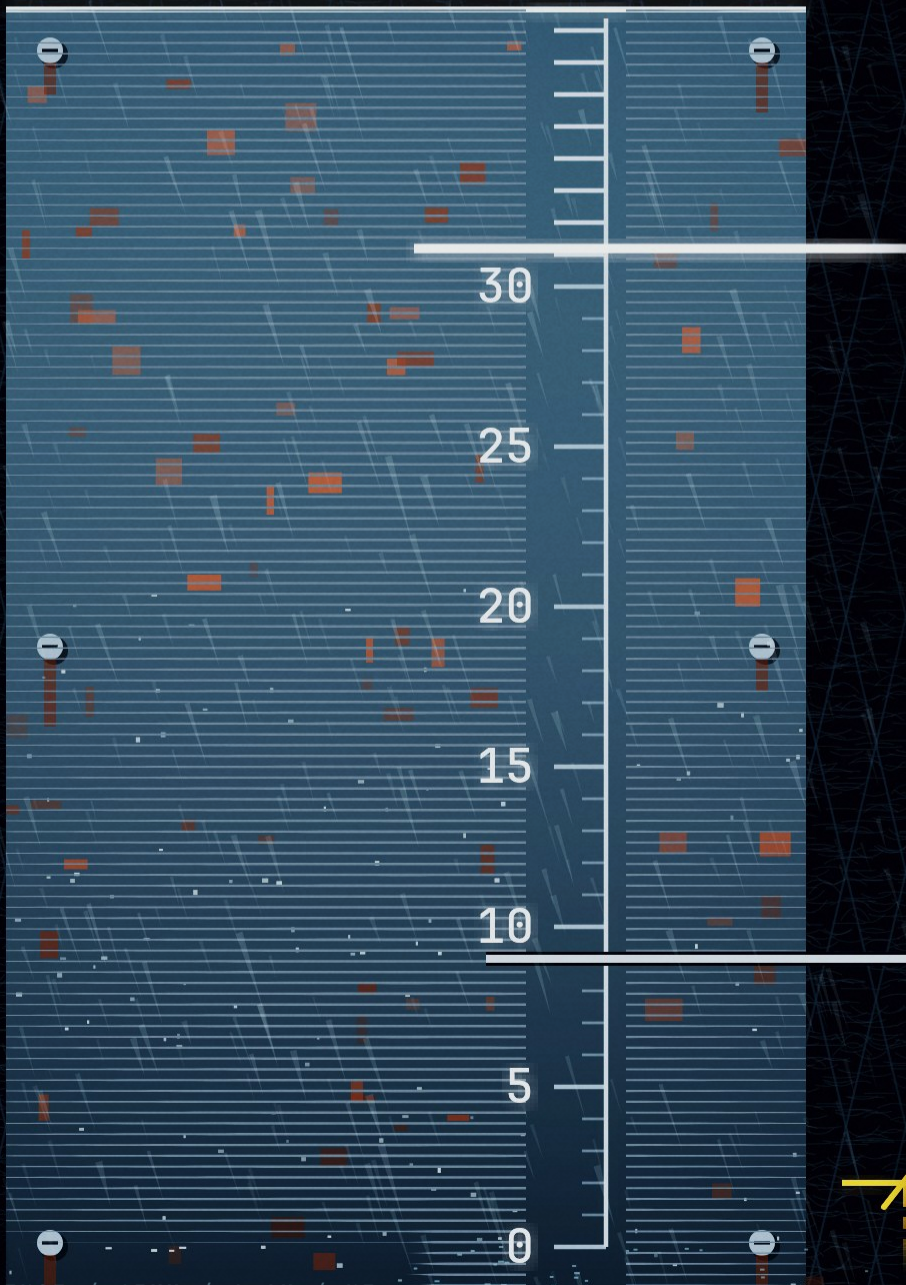

THE ONLY NUMBER

The only number on this load came from the co-op.

DIFFERENT THINGS, NOT ONE SUM.

THE TICKS KEEP GOING. NOTHING LABELS THE TOP.

MARCH PEAK, JUST OVER 31 MW (C06)

An estimate the cooperative made itself. The Navy supplied no figure.

PILLAR MOUNTAIN, 6 x 1.5 MW (C11)

COULD BE UP TO AN ADDITIONAL 2 MW (C05)

SPRUCE CAPE

A footprint, and no purpose visible from the road.

The Navy calls it a multi-mission support building. Its spokesperson describes site preparation, paving, and construction including electrical and mechanical subsystems. It is unclear when that work will begin.

POWERED FROM THE EXISTING GRID, WITH BACK-UP GENERATORS
(C03)

C01 C17

C18

ROAD EDGE, SPRUCE CAPE / 85MM / 1.8M / NE

07 / 09

WHAT IS ESTABLISHED

A denial is not a finding. A rumor is not either.

The Navy says the building is not a data center, by email to KMXT on August 14th and separately to Sen. Sullivan's office. Neither that nor the island's rumor is established here.

SOURCED

KODIAKELECTRIC.COM, READ
SEPTEMBER 4TH, 2026.
ISOLATED GRID. 85
PERCENT TERROR LAKE. SIX
TURBINES. A 98 PERCENT
AIM. (C08 C09 C10 C22)

ONE NEWSROOM

KMXT, SEPTEMBER 3RD,
2026. EVERY EVENT, QUOTE
AND MEGAWATT FIGURE
OUTSIDE THE CO-OP'S OWN
SITE. (C01 to C06, C11
to C18)

*"I've never heard of this. I think it's a rumor, but if it's true,
I think it's a bad idea, and I will work to stop it,"*

SEN. DAN SULLIVAN TO THE KODIAK DAILY MIRROR,
AUGUST 11TH, VIA KMXT (C14)

One number here was measured. The other one the co-op had to estimate.

C06 C05

Who should have to publish the number, the new load or the co-op that plans for it?
