

829 acres. 20 years.

The notice named no tenant.

THE LEASE, PER UNIVERSITY OFFICIALS

Terra Energy is the tenant.

Signed in late May for 20 years. The lease describes the Terra Energy Center Campus as "a large-scale industrial park," with energy generation, transmission, storage and distribution among its uses, and lets Terra sublease to future tenants.

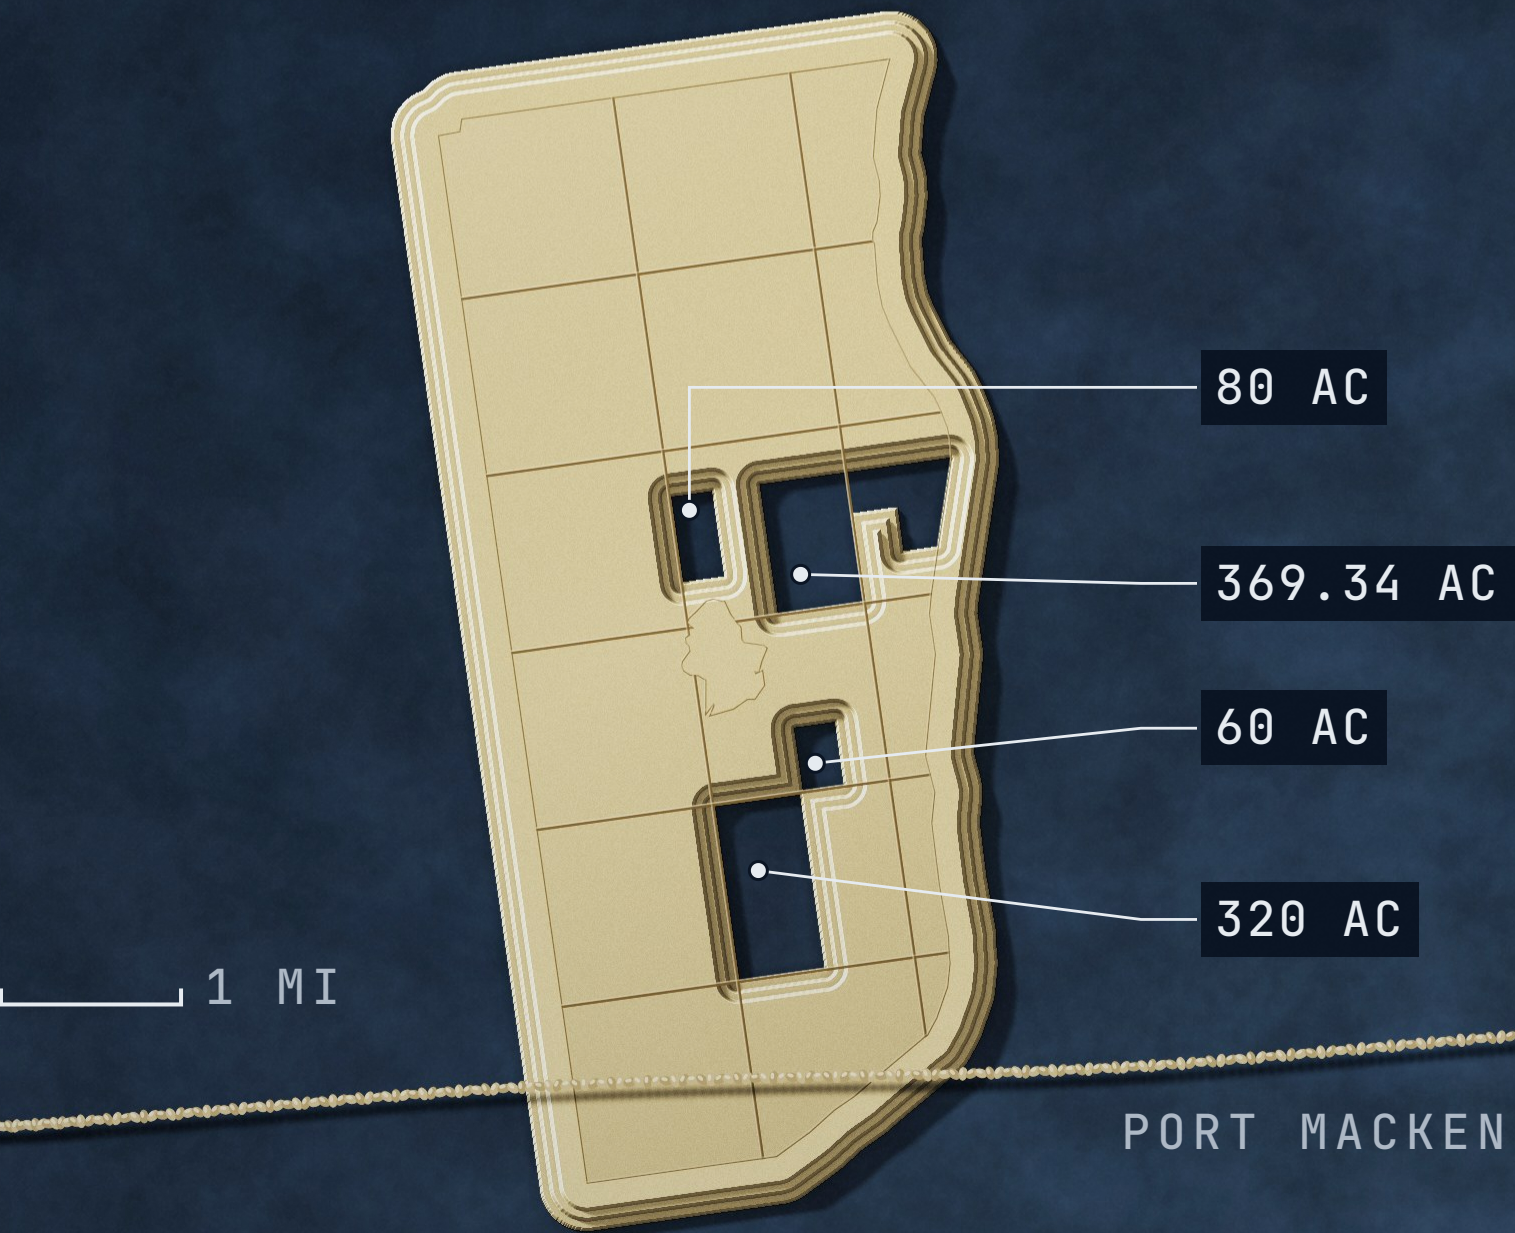

T14N R4W, SEWARD MERIDIAN

An inholding in the borough's port.

The four parcels sit inside the Mat-Su Borough's 8,000-acre port district. Borough officials weren't told before the university signed. Port manager Dave Griffin said it "blows my mind."

TERRA'S PLAN  CONFIDENTIAL, PER THE UNIVERSITY

University land skips the best interest finding.

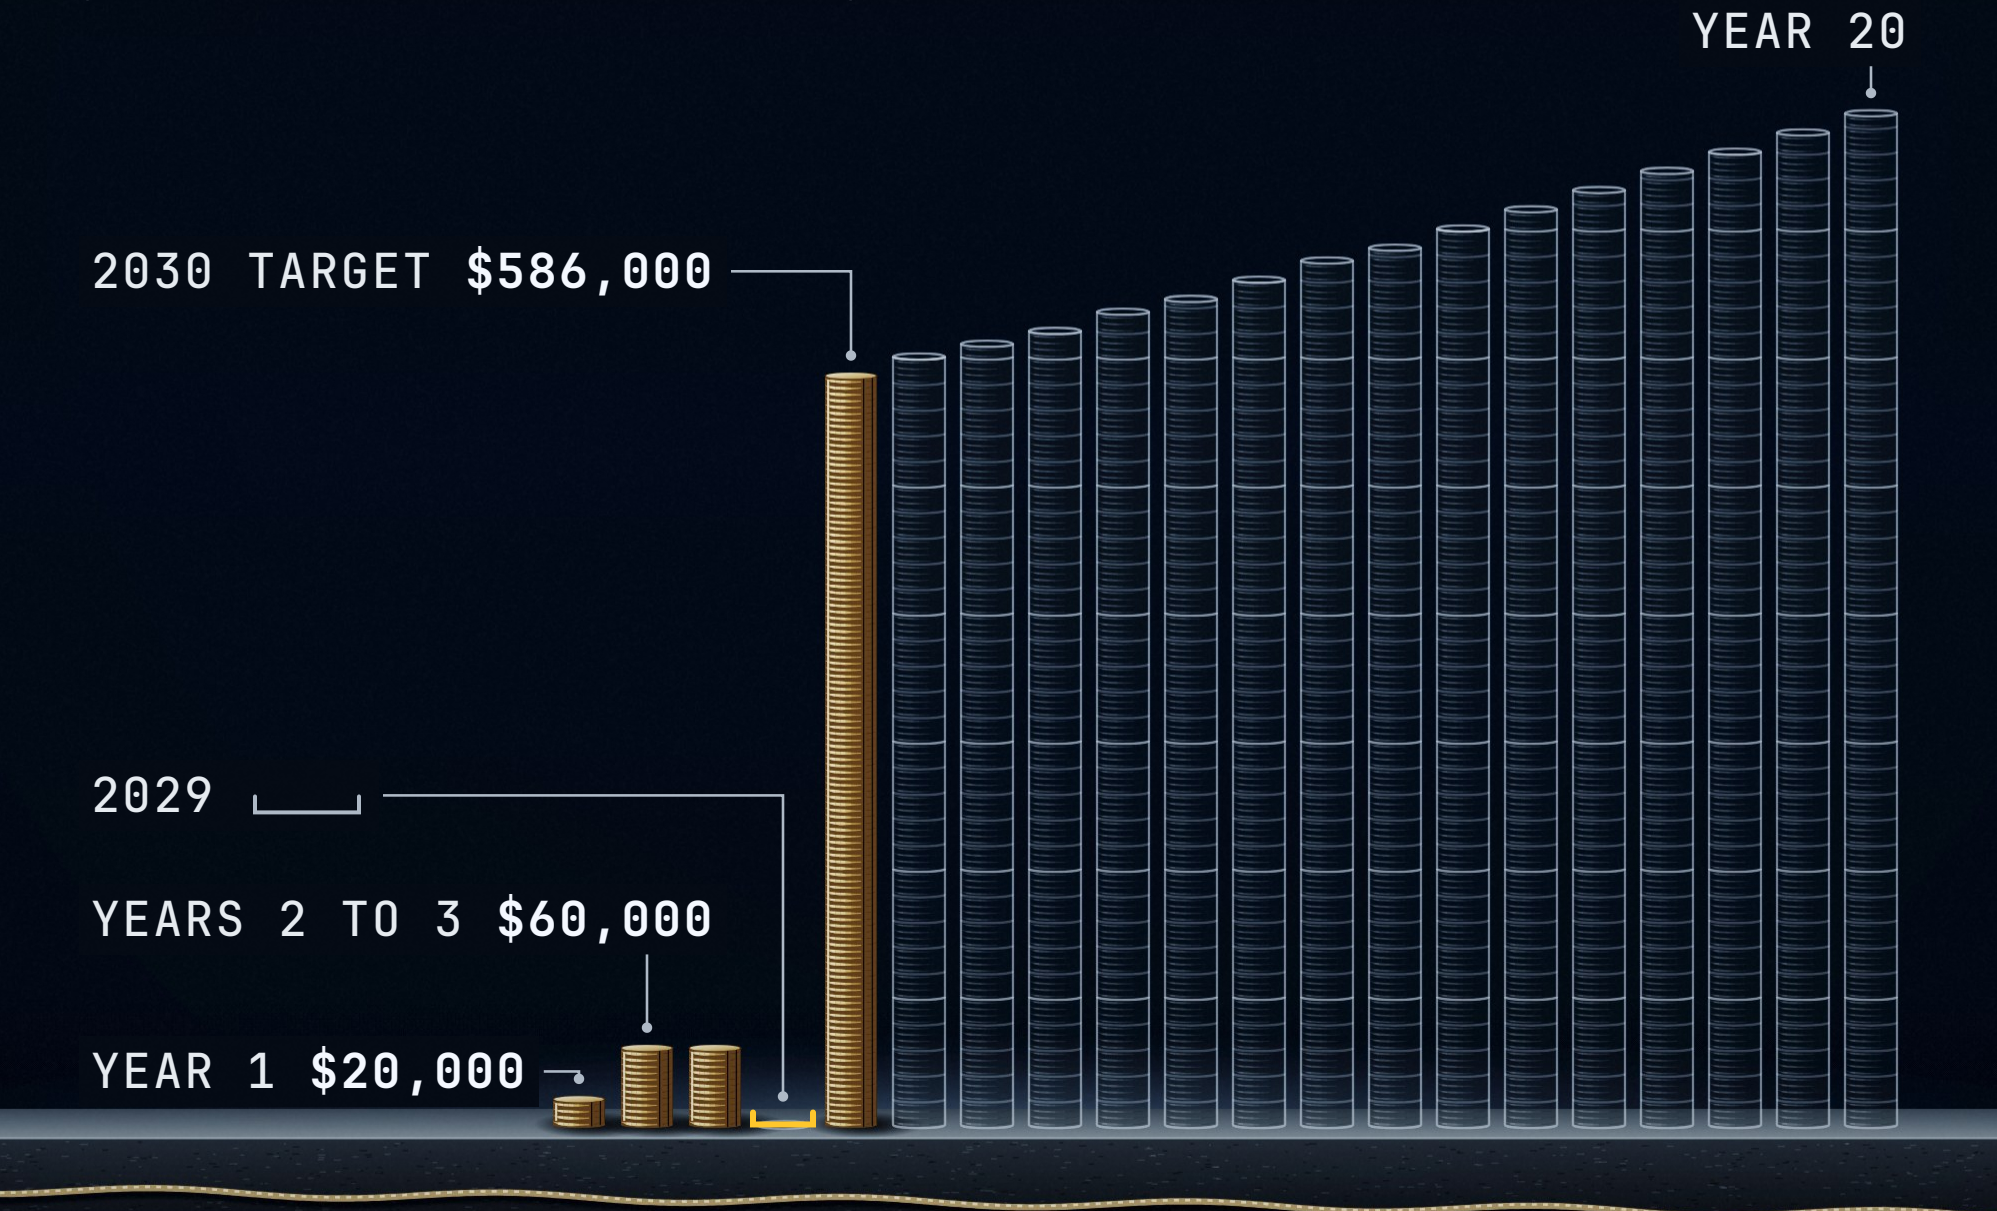

Projects on university land are exempt from the finding the state requires for major actions on state land, per the Mat-Su Sentinel.

RENT, PER THE MAT-SU SENTINEL

\$20,000 the first year. \$586,000 once it operates.

Then \$60,000 a year in years two and three.
Construction would begin in 2029, and the report gives no figure for that year. Operations are targeted for 2030, and rent would rise 2 percent a year to the end of the 20-year lease.

ONE COIN = \$5,000. OUTLINED STACKS ARE
PROJECTED, ADDING 2 PERCENT A YEAR.

FLATLANDS ENERGY, TERRA'S AFFILIATE

The campus is part of a coal plan.

Flatlands Energy plans a coal plant near Skwentna. DOE selected the project for \$89 million in engineering funding for a planned 1,250 MW plant and lists data centers among the loads it would serve. The university's own information doesn't highlight data centers.

Terra didn't respond to the Sentinel.

“ ”

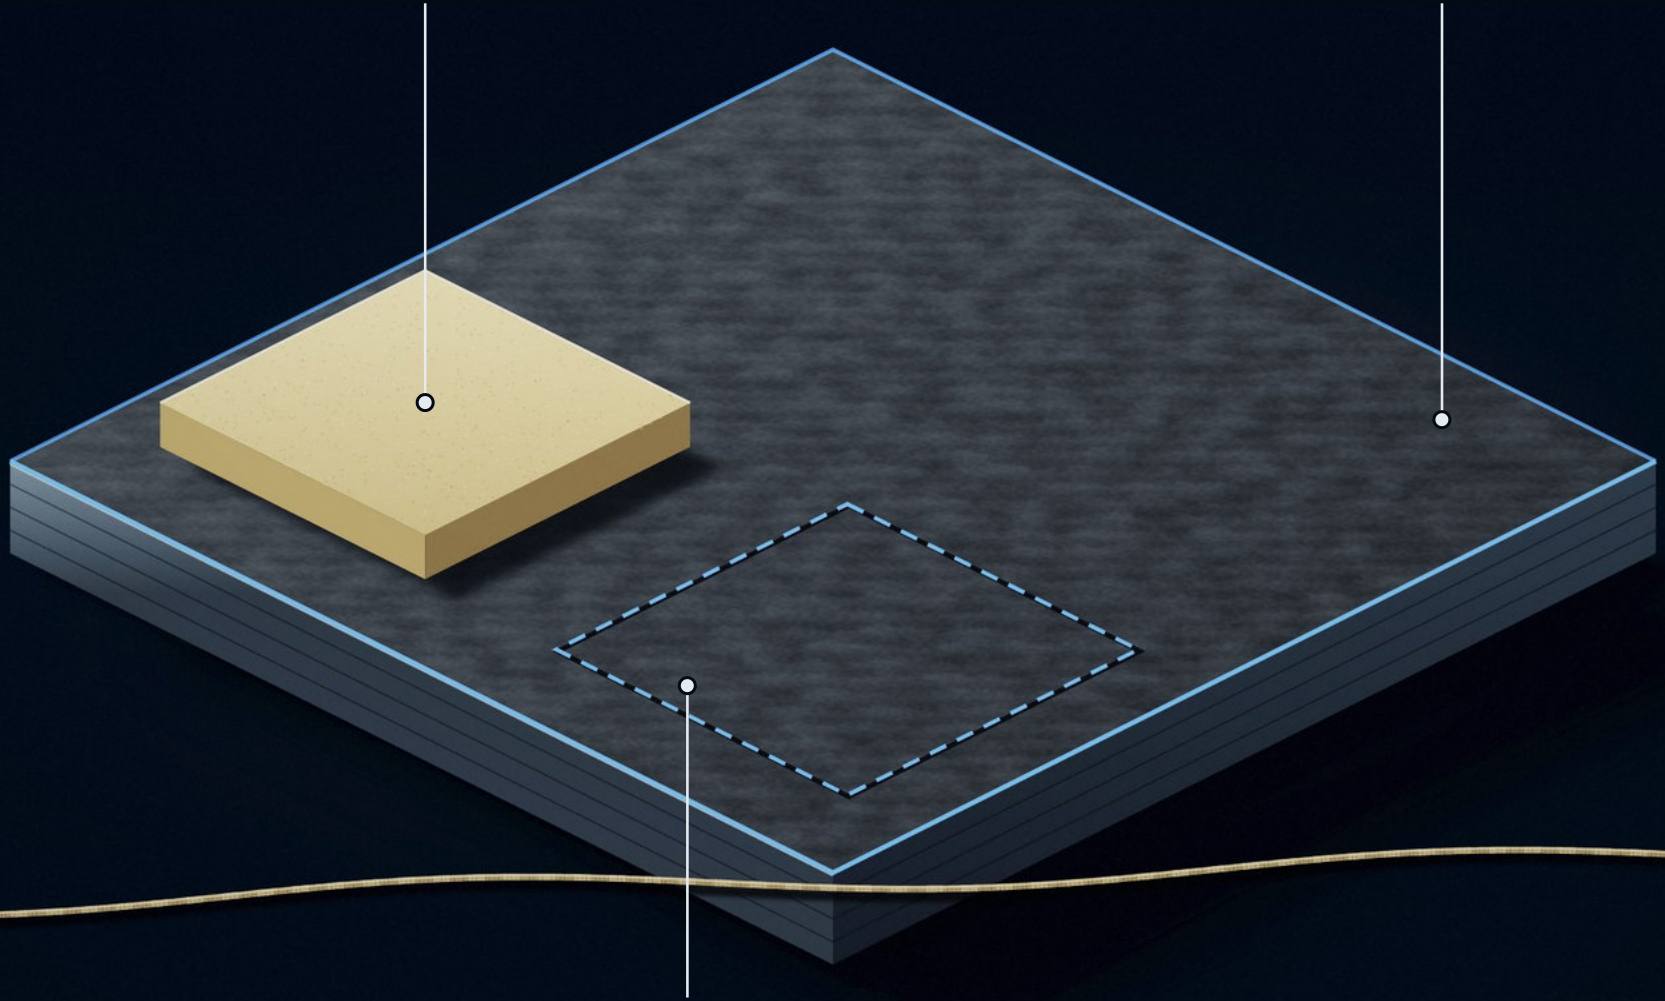

The borough markets land with Terra.

In March the Assembly overrode a veto 6-1 to court large power users with Terra, data centers among them. Officials expect Terra to seek about 1,000 borough acres near the port.

UNIVERSITY, 829 ACRES

PORT DISTRICT, 8,000 ACRES

ABOUT 1,000 ACRES, EXPECTED

Should a university land notice name its purpose before comments close?
