At this distance the median Alaska gift is a whole gift.

The largest one can't fit in the frame. Both are drawn at the same constant, which is the only reason the comparison means anything.

\$4,000. THE LIMIT ALASKA JUST VOTED FOR.

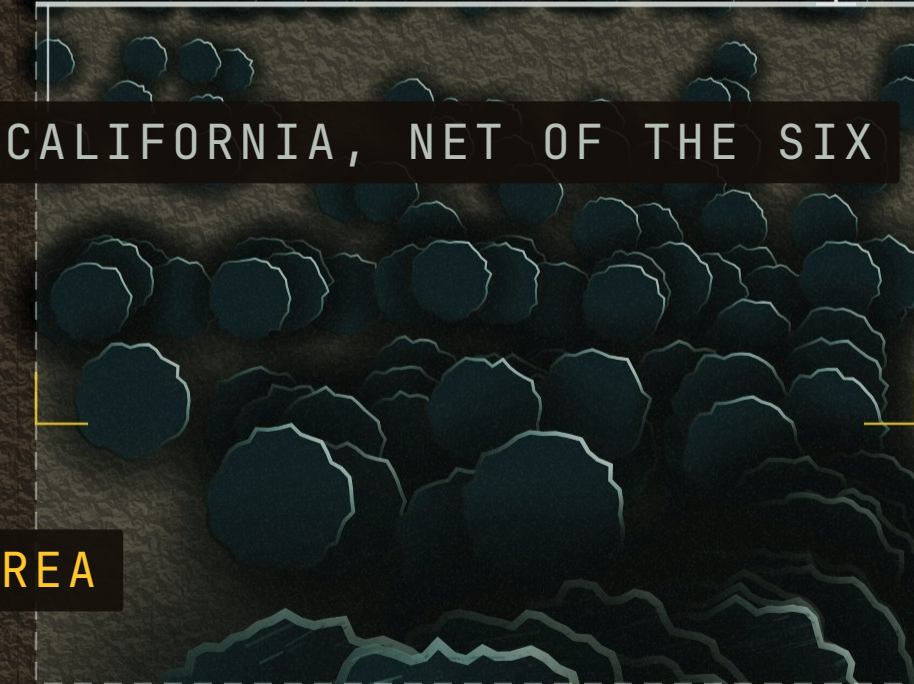

Alaska sent most of the gifts. Not most of the money.

2,705 of the 4,604 transactions came from Alaska addresses, 58.75 percent of them, carrying 26.56 percent of the money. The median Alaska gift is \$50. California sent more, and it only sent more because six of its donors are

Four tickets. Old rules.

Alaska Public Media reported on the night of the vote that the measure would take effect after the November general election. The initiative's own text says it does not apply to contributions made to influence an election that occurred on or before its effective date.

WITH 37,006 VOTES, 22.5 PERCENT OF 164,303.

Should a rule that passed with 72 percent wait for one more race?
