SEPTEMBER 4TH

THE AWARD SAYS IMPLEMENTATION NOT PLANNING

Ryan Air was awarded \$4,171,115 to deploy "autonomous cargo drones and electric vertical take-off and landing aircraft" carrying pharmaceuticals and moving patients across roadless communities. IA means aircraft, not a study.

UNALAKLEET, 1953

A FAMILY FREIGHT LINE WITH A GRANT

Ryan Air started in 1953 in the village of Unalakleet and is managed by the third generation of the Ryan family. It serves 80 villages throughout Western Alaska and operates 24 aircraft out of eight hubs.

AIRCRAFT TAKE THE PLACE OF AMBULANCES

402 Alaskan communities depend on aviation for year round access, where aircraft often take the place of cars, school buses, semitrucks, and ambulances. That is 82 percent of the state's communities, served by 235 airports. Ryan Air's own proposal calls the gap "life-threatening".

THE INTERIOR GOT A YEAR TO PLAN

Tanana Chiefs Conference took \$250,000 for a planning year on the same idea, a drone pharmaceutical route from a Fairbanks hub to 42 Interior villages across 94,000 square miles. Tanana Chiefs says winter medication delays of 5 to 14 days are common.
