

FERC P-15423-000

So far, the Cook Inlet data center is a document.

DAY 17 OF 59
SEP 4TH TO NOV 2ND

TODAY

THE RECORD

Applied.

DeepGreen Cook Inlet SPV, LLC filed an application for a preliminary permit on February 11th and supplemented it on June 26th. FERC signed the notice September 1st. The Federal Register published it September 4th.

An application is not a decision.

DEEPCOOK INLET SPV, LLC

FEB 11TH

JUN 26TH

SEP 4TH

50 DAYS

Proposed.

66 modular subsea-compute hives, which the notice also calls data center pods. 330 to 350 marine hydrokinetic turbines. A 3.5 mile, 115 kV hybrid power and fiber-optic armored cable, landing in the Nikiski Industrial Corridor.

alaskaaihq.com

WHAT A PERMIT IS

Priority.

"The sole purpose of a preliminary permit, if issued, is to grant the permit holder priority to file a license application during the permit term."

FERC NOTICE, PUBLISHED SEPTEMBER 4TH

It would not authorize construction, land-disturbing work or entry onto property owned by others.

AS THE NOTICE PRINTS IT

100 megawatts

"The estimated annual generation of the DeepGreen Project would be 100 megawatts, which would primarily be utilized to power the subsea data center."

A megawatt measures power, not a year of it.
That is the notice's own wording.

NOT CONVERTED. NOT CORRECTED.
QUOTED EXACTLY.

THE DEEPGREEN COOK INLET NOTICE

What it says. What it doesn't.

IN THE FEDERAL NOTICE

DOCKET	P-15423-000
FILED	FEBRUARY 11TH
PUBLISHED	SEPTEMBER 4TH

ALASKA ENERGY AUTHORITY, SEPTEMBER 14TH

Nobody called.

"We're going to file to intervene and oppose it, just so we have a position. We've had no communication with them."

CURTIS W. THAYER, CEO AND EXECUTIVE DIRECTOR, AEA

The Peninsula Clarion reports that DeepGreen cited AEA's own planned Cook Inlet PowerLink, 38 miles and up to 200 megawatts, in its federal filing.

NOT IN THE FEDERAL NOTICE. ONE NEWSPAPER. ONE REPORTER.

ORPC says it has no affiliation with the project and is not participating in it.

WHO ELSE CAN FILE

Anyone. Including a rival.

The window takes comments, protests and motions to intervene. It also takes competing applications for the same site, and notices of intent to file one, under 18 CFR 4.36.

A place in line is a thing other people can want.

File. November 2nd.

Comments, protests, motions to intervene and competing applications are due 5:00 p.m. Eastern Time on November 2nd, on FERC docket P-15423-000, through the Commission's eFiling system.

The Peninsula Clarion reports the deadline moved from October 31st, a Saturday.
